DETAILED ACTION

Claim Objections

Claim 3 is objected to because of the following informalities: In line 14, it appears that "mutual interval" should read "location", as in line 12. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Yamaguchi et al (Japan 2002-256896). In Figure 3, motor 22 and drive means 26 are located in an interval between the throttle valves 7 close to the center, and return spring 9 is located near the drive means 26.

Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Evans et al. In Figure 5, Evans et al discloses drive motor 32 and return spring 26 at one end of the plurality of throttle valves.

Allowable Subject Matter

Claims 2 and 4-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The throttle arrangement made of record and not relied upon is considered pertinent to applicant's disclosure.
